

# KAT MASTER HITCH (HYDRAULIC)

WBM KAT (Kwik-a-Tach) Master Hitch is the centerpiece product that increases versatility of wheel loaders by allowing quick and easy inter-changeability of attachments.

By installing KAT hooks or lugs in place of the factory or OEM pin-on lugging on an attachment, the KAT Master Hitch is capable of changing the attachment utilizing a hydraulic or manual lock pin system. Hydraulically operating the KAT Master Hitch enables the operator to change the attachments without leaving the cab of the machine.

## FEATURES & BENEFITS

- Designed to pin-on the boom and linkages using OEM specifications
- Utilizes a top round bar and horizontal lock pin for lug hook-up
- Allows inter-changeability of attachments manufactured for that machine
- Decreases time spent in change attachments
- Variety of master hitches available to match any quick attach lug

## STANDARD EQUIPMENT

- Hydraulically actuated lock pins
- Heavy duty frame
- One double acting cylinder

## OPTIONS

- Manually operated lock pins
- A four hook KAT Master Hitch is available for machines to help stabilize large attachments
- Third Valve Power Beyond Kit\*

*\* A Third Valve Power Beyond Kit is a method of using the loader's 3<sup>rd</sup> valve to operate both the cylinder and a hydraulic function on the attachment.*
