

HIGH CAPACITY CUT-TO-LENGTH GRAPPLE

WBM's High Capacity Cut-to-Length Grapples (formerly known as Pelican Grapples) are designed for single pass loading/unloading in barge and mill yard applications.

FEATURES & BENEFITS

- Grapple profile and large envelope designed to suit wood length and trailer bunk size (on/off highway)
- Great for large capacity log handling or sorting with tip-to-tip precision
- Excellent visibility for the operator
- QT 100 (alloy) material and box-type construction provides strength and durability, with lightweight design
- Enclosed dual overarm hydraulic cylinders provide positive holding and load stabilizing
- One-piece wear plate on shoes
- LED work lights
- Ground level remote greasing to main hinge points through overarm
- Low profile high-strength tines provide excellent clearance to bunks
- Square overarm with split nose piece

STANDARD EQUIPMENT

- High pressure dual hydraulic cylinders
- Conveyor style hold down chain
- Weld-on (EN 30B) round bar tips
- OEM pin-on lugs
- Tines can be pinned (rigid) or unpinned (floating)

OPTIONS

- Bolt-on cutting edge between tines to enable grapple to be used for yard clean up
- Tapered overarm with split nose piece
